### ABOUT ME

---

I am a passionate and dedicated IT student who has successfully completed the 4th semester of my undergraduate program. With a strong foundation in programming, databases, and networking. I am now eager to apply my knowledge in a real-world setting through an internship in the IT industry. I thrive on solving problems, learning new technologies, and contributing to innovative projects. Known for my curiosity and quick learning abilities, I am always ready to take on challenges that help me grow both personally and professionally. I believe an internship will not only give me hands-on experience but also allow me to bring fresh perspectives and energy to a dynamic team.

### WORKING EXPERIENCE

---

**CREATED DATABASE**

I have created a database using c++ .Assisted in creating and maintaining a basic database for organizing and storing information.Collaborated with team members to design simple data structures and input methods.Supported data entry tasks, ensuring accuracy and consistency.Participated in testing and identifying issues to improve database functionality.Learned to use database management tools and gained hands-on experience in data organization.
